

OPTIFUEL ACADEMY VEHICLE FAMILIARISATION

Your drivers will spend many hours per day behind the wheel, so it is vital that they familiarise themselves with the vehicle and the abundance of fuel and labour saving devices equipped on a modern truck.

As a follow on to the Opti-Drive training course*, which primarily focuses on the vehicle's transmission, this course teaches your drivers more about the whole vehicle and focuses on ways to improve fuel economy. The core content contains both classroom and practical activities as well as an opportunity for drivers to take an extended drive in a vehicle. This will enable them to practise new skills and techniques that, if applied correctly, can significantly improve fuel efficiency whilst making a noticeable difference to your operating costs.

7 CPC HOURS

Benefits

- Better utilisation of the vehicle
- Lower fuel and maintenance costs
- Reduced stress and fatigue
- Increased safety and a lower risk of injury
- Reduce environmental impact
- Defensive driving ability

Course Content

- External walk round of the vehicle
- Internal introduction to the vehicle
- Opti-Drive transmission training*
- Presentation and discussion of the theories behind fuel economy and Opti-Drive*
- Basic tachograph introduction
- An extended drive which includes opportunity to practice the new techniques
- Defensive driving techniques

Course Details

Course Name: Vehicle Familiarisation

Course Reference: CRS10592/89

Course Length: 1 day

CPC Hours: 7 hours

Training Method: Classroom/Truck

* Pre-requisite course: Opti-Drive Training
