Welcome to our range of tailor-made, sustainable haulage solutions

At Renault Trucks, we're committed to supporting you with your energy transition, by offering you adapted solutions to reduce the carbon footprint of your activities. Thanks to a personalised approach and proven technologies, our trucks incorporate energy optimisations that combine performance and driving pleasure. We make a point of continually investing in the quality and reliability of our vehicles. Our trucks are designed for driving comfort and safety, and ergonomics designed to optimise daily efficiency. By working with high-quality materials and advanced technologies, we are able to provide you with vehicles that meet the highest standards.

With expertise and in-depth knowledge across various business sectors, we offer tailor-made solutions for your unique needs. Our specialist sales teams provide expert advice to help you configure the ideal truck and equipment for your business. Discover our industry-specific trucks and let us support you with high-performance solutions!

5 reasons to choose Renault Trucks

Renault Trucks is the ideal partner for completing your mission successfully. We are relentless in seeking out new solutions to provide you with the best support and to meet your requirements.

1 A network of professionals at your side and at your service

2 Service offers for your entire journey

3 Your comfort prioritised with redesigned cab equipment

4 Increasingly fuel-efficient technology and engines

5 New safety components to give you peace of mind in your daily activities

Services to optimise your productivity

Breakdown recovery service

Instant care

From your first call, you will be supported by a team of coordinators, with a choice of 18 different languages, who will keep you updated throughout the progress of your repairs.

Clear, precise information

Wherever you call from, the coordinator uses the 24/7 button in the vehicle cab* to geolocate you and inform you of the arrival of the Renault Trucks repairer.

Technicians trained to work at the roadside

Breakdown recoveries are carried out by technicians trained for roadside operations.

They work with dedicated diagnostic tools and operate vehicles with special equipment.

2 year warranty

A 2 year parts, breakdown and recovery warranty for all operations carried out by an approved Renault Trucks repairer.

Our Genuine parts

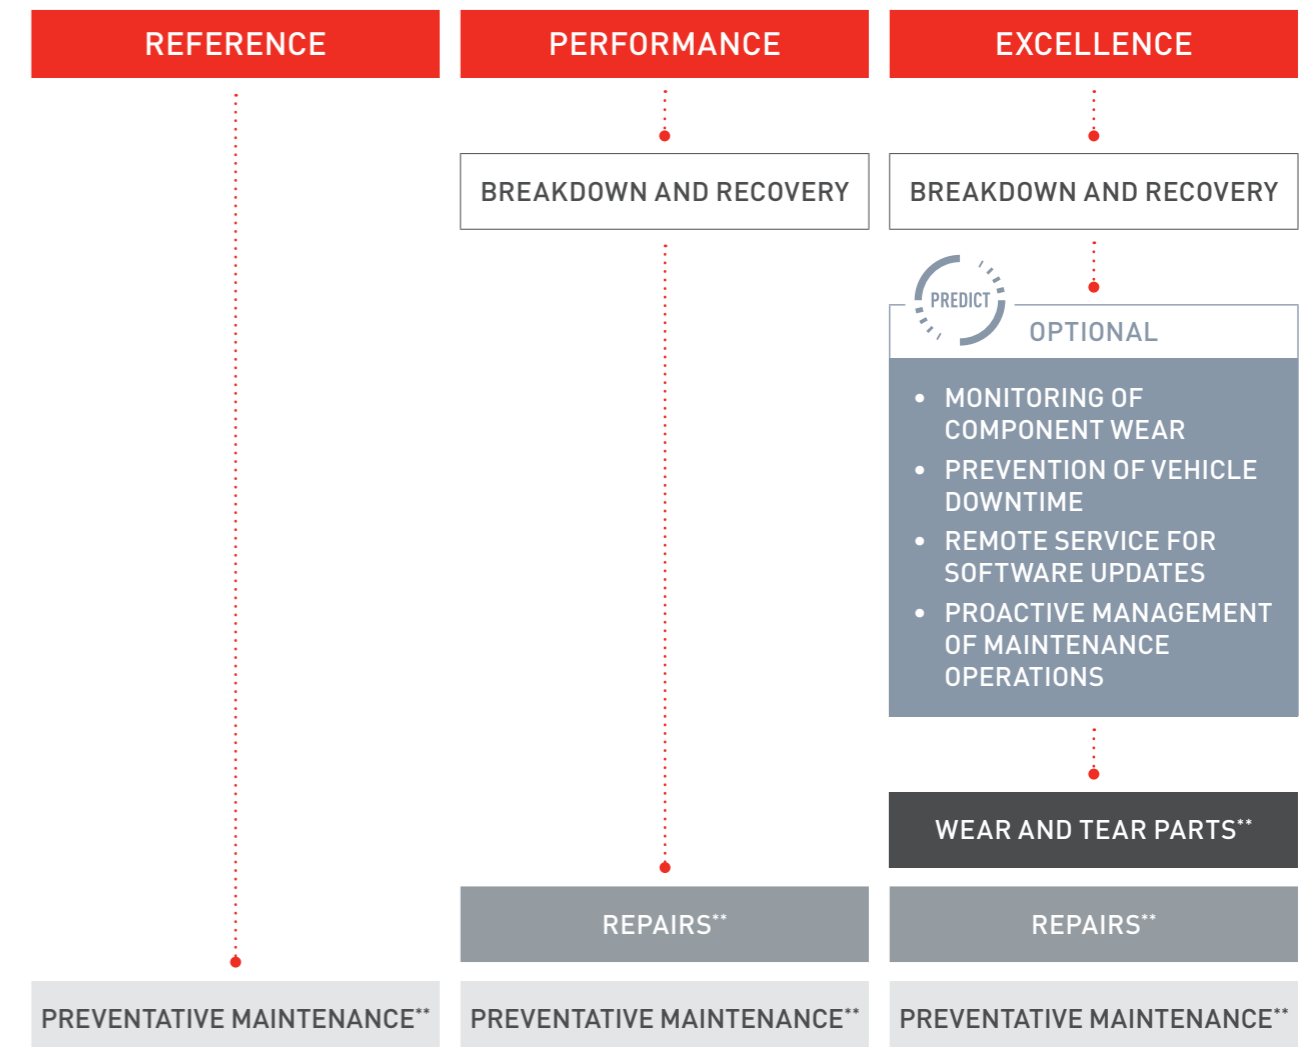

Choose quality original parts: reliable, robust and approved to maintain vehicle performance.

Our Reman offer

A range of reconditioned parts that meet the same technical requirements as new parts to guarantee perfect compatibility with your vehicle.

*Depending on vehicle options

Service offers for diesel vehicles 0 to 5 years old

**Parts list available upon request from your dealer

Make the most of your fleet with our Optifleet solution

Renault Trucks Optifleet is a comprehensive fleet management solution that uses Over-the-Air technology to provide real-time data on vehicle and driver performance. This service enables you to optimise your haulage operations by accessing your vehicle data anytime, anywhere.

Improve your energy consumption Optifleet Check

- Monitor your vehicle and driver to maximise your fleet's performance (fuel consumption, speed, topography).
- Group your vehicles at depot level or by vehicle type to review like for like performance.

Real time vehicle locations Optifleet Map

- Track your vehicle's real time location and position history.
- Create geofences around key locations.

Manage compliance Optifleet Drive

- Manage your drivers' infringements and working hours.
- Download your vehicle and driver tachographs remotely.

View the state of health of your vehicles Optifleet Health

- Receive information on dashboard warning lights that are active.
- Assistance to reduce potential downtime and breakdowns.

Ensure safer driving Optifleet Safety

- Ensure your vehicle is driven in the safest way through detecting unsafe behaviours.
- Identify unsafe driver events, such as harsh braking / acceleration, lane departures, AEBS activation etc.

Remote service

You can connect to your vehicles even if they are not moving, and update software without needing to stop the vehicle.

All-in-one financing

Your financial partner speaks Trucks* fluently.

At Renault Trucks Financial Services, we speak your language and we offer many financing solutions, including standard credit, lease purchase, and finance lease that can be adapted to your requirements. The global financing offer allows you to have full control of your total cost of ownership.

Long haul Renault Trucks T / T High

Discover our optimised long haul vehicles. Designed to go the distance while limiting CO2 emissions and fuel consumption, and giving you the best possible driving performance!

Equipped with:

- DE13 Turbo Compound engines at the heart of an optimum drive chain
- Aerodynamic components
- Latest version of Optivision+
- Class A+ tyres

Profitability at the wheel

Renault Trucks T and T High are recognised as extremely reliable vehicles, thanks to their many years on the road, the use of proven technologies and the results of quality surveys.

Our vehicles are perfect for making every journey a profitable one. They also feature the latest driver assistance technologies and the most advanced braking systems.

Ensuring the safety of drivers, pedestrians, cyclists and other road users is our priority.

Aerodynamics to improve energy efficiency

- 1 Different types of roof deflectors**
Fixed (88 mm), manual adjustment with quick adjustment option (from 285 to 496 mm) - folding side air deflectors.
- 2 Windscreen angled to 12°**
- 3 Bumper with integrated spoiler**
- 4 Trapezium-shaped cab**
2.3 m at the front and 2.5 m at the rear.
- 5 Rear-view cameras**
- 6 Fairing extensions**
On chassis and door extensions.
- 7 Deflector integrated into headlamp unit**
- 8 Wheel housings**
Improves air flow and reduces water splashing.

Construction Renault Trucks C

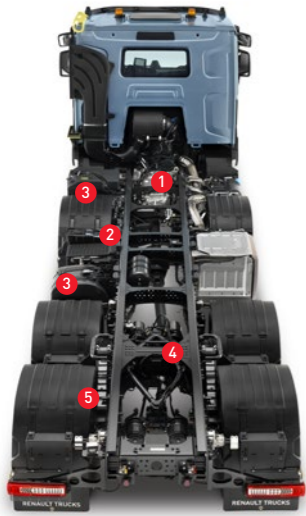

Renault Trucks C performs just as well on the track as it does on the road, making it a rugged, versatile ally that lets you reach your delivery sites with complete peace of mind. Its tight turning circle and drive functions make it easy to access narrow or difficult sites.

Protective headlamp grilles

with polycarbonate light units as standard, ensuring greater impact resistance.

Bumper according to use

100% steel for off-road use
Steel corners for mixed use
Plastic for road use.

The Renault Trucks C comprises of technical solutions and components that undergo rigorous testing. This robustness is also reflected in the exterior vehicle design.

- 1 Mechanical front suspension up to 10 t for heavy-duty applications, and air suspension up to 9 t.
- 2 7 or 8 mm straight side members.
- 3 Steel and aluminium diesel tanks with an extended range of reinforcements designed for off-road use.
- 4 Separation of wiring harnesses and air hose bundles for easier maintenance.
- 5 Mechanical or air suspension from 13 to 26 t.

Up to 22.8 t payload for maximum productivity

Exceptional body fitting options

Mechanical and electrical pre-equipment.

Power take-offs

for operating bodybuilder equipment when moving or when stationary, from 270 Nm to 2000 Nm on gearbox and/or engine.

Rear overhang

available in 50 mm increments for optimised, high-quality body options.

Optimal drive

- 25° approach angle with 100% steel bumper.
- Ground clearances of 312 mm under the front axle and up to 440 mm under the tank.
- Inter-wheel and inter-axle differential lock on all models.
- Manual accelerator to maintain a constant engine speed regardless of terrain relief.
- Off-road mode for optimised gear shifts.

C OPTITRACK

Thanks to a hydrostatic drive system on the front wheels, Optitrack can remove the vehicle from difficult situations at speeds as low as 0 km/h, while keeping the vehicle weight down and fuel consumption low.

RIGID TRUCK C 8X4*4 TRIDEM

The most manoeuvrable vehicle on the market, with a steered lift axle for up to 9 tonnes of load capacity and a turning radius up to 15% tighter than a standard 8x4.

Heavy Construction Renault Trucks K

Quarries, mud, uneven terrain, Renault Trucks K ensures that your missions will be carried out successfully, even over the most extreme terrain. The wide range of products on offer and the optimisation of the driveline increase the productivity and profitability of your business.

Cyclonic air primary filter

adapted to dusty environments.

Optidriver XTREM

heavy-duty gearbox for tough applications.

Front mechanical suspension 8 to 10 t

with heavy-duty solutions for severe conditions.

Protective shields

on equipment exposed to impact: EACU, pneumatic equipment.

Separation of air hose bundles and electrical harnesses

for simplified maintenance.

100% steel bumper

as standard, in three sections to reduce maintenance costs.

Straight side members

8mm

Extended range of side member

reinforcements to guarantee the mechanical strength of the chassis frame.

Protective headlamp grilles

with polycarbonate headlamps (as standard), set back in the bumper for better impact resistance.

Semi-elliptic or parabolic suspension

26 t parabolic 3 leaf blades,
32 t semi-elliptical, 11 leaf blades,
38 t Xtrem parabolic, 4 leaf blades.

Steel and aluminium fuel tanks

designed for off-road use.

Outstanding terrain negotiation capability

Chassis, driveline and cab all work together to enable you to work and travel in the most extreme situations with maximum traction and efficiency. The steering precision and the tight turning circle offers excellent handling.

Reduced turning circle,
to facilitate manoeuvring.

380 mm under-axle ground clearance

Protective screen
under the radiator and air management components, as well as the steel engine bowl.

32 degree approach angle

Double reduction tandem axle
for greater traction on difficult terrain.

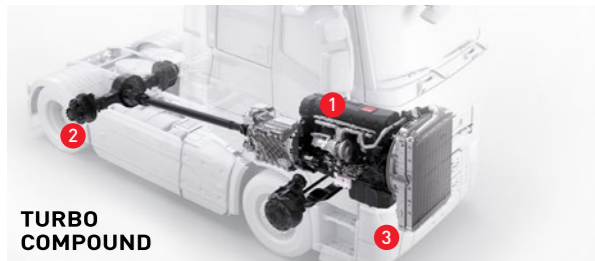

Inter-axle and inter-wheel differential locks
standard on all models.

515 mm ground clearance underneath the tanks

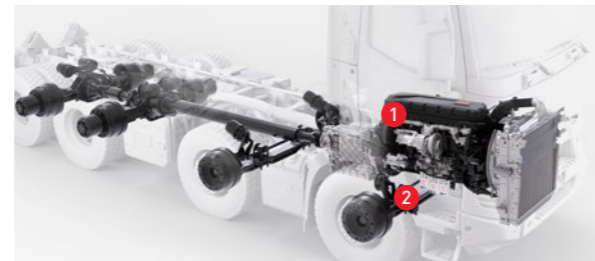

A driveline geared to fuel economy and driving pleasure

We are relentless in our quest for efficiency and we will provide you with the optimum fuel efficiency for your vehicle use.

Renault Trucks T / T High

- 1 DE11, DE13 engines and DE13 Turbo Compound and adapted oil service intervals
- 2 A+ tyres as standard
- 3 Optimised gear ratios

Renault Trucks C

- 1 DE11, DE13 and DE13 Turbo Compound engines with adapted oil service intervals
- 2 Optimised gear ratios

Renault Trucks K

- 1 DE11 and DE13 engines and adapted oil service intervals

Our engines, combined with the new technology and services, are part of an effort to decarbonise diesel vehicles through the reduction of CO2 emissions.

Our engines benefit from:

Improved engine combustion thanks to:

- Wave pistons
- New injectors
- Latest-generation filters

Reduced friction losses:

- Improved engine friction
- Ball bearing turbo compressor
- Variable-flow power steering pump
- More efficient air compressor
- Even more efficient lubricants

An upgrade of the Optidriver gearbox:

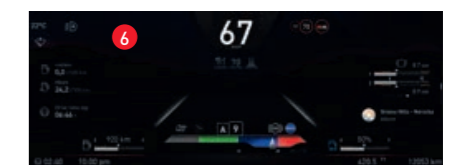

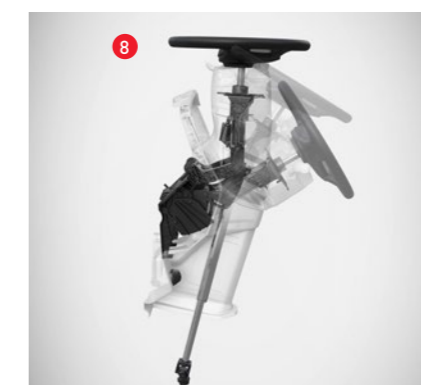

- Resulting in gear shifts that are 30% quicker and smoother
- Benefiting from enhanced Optivision + software including road sign recognition

A new, optimised interior promoting driver well-being

Onboard a Renault Trucks vehicle, the tiniest details have been designed to combine ergonomics and convenience - something to make you really feel at home behind the wheel and during breaks.

- 1 Keyless vehicle with start button
- 2 Smooth gear changes thanks to the Optidriver gearbox
- 3 Smart direction indicator management
- 4 Steering wheel-mounted controls
- 5 2 USB-C sockets
- 6 A modernised instrument panel
 - New, dynamic digital information display
- 7 A multi-function display that's modern and easy to use
 - 9-inch HD touch screen
 - Makes driving easier and increases your safety (cameras, navigation)
 - Quick access to applications to enhance your driving experience
 - Making calls
 - Listening to music
- 8 A steering column with multidirectional adjustability
 - Adjustable along 3 axes so you can adapt the driving position exactly to your body shape
 - Intuitive foot-operated steering wheel adjustment for the ideal driving position
 - Easy access to the cab when the steering wheel is in the up position
 - Greater knee room
 - Engine vibration absorption for increased comfort
- 9 Rear-view cameras for stress-free driving
 - Support for manoeuvring and overtaking
 - Improved night vision

A home-like living space

The Night & Day cab offer comfortable, spacious accommodation with bunks and storage options.

- 1 Cup-holder (optional)**
close to the driver
- 2 Front storage lockers**
accessible above the dashboard
- 3 221 l of storage space* (optional)**
→ Illuminated compartments
→ 24 V socket on rear of the cab
*on Maxispace cab
- 4 Two USB-C sockets**
in the bunk
- 5 Silent operation electric refrigerator* (optional)**
40-litre capacity or 26 litres on Renault Trucks T
*only on Renault Trucks T High
- 6 Interior/exterior storage compartments**
→ Easy loading of heavy luggage (easily holds a pack of 6 x 1.5l water bottles)
→ Integrated storage pockets to keep belongings in place and within easy reach of the bunk
- 7 Ultra-comfortable "Sérénité" bottom bunk**
→ Length 2,018 mm
→ Width: 671 mm behind the seats, 791 mm in the middle
→ Twice as many springs and a thicker mattress that adapts to all body shapes
→ Mattress can be separated from its base in order to use a fitted sheet
→ New easy-clean textured fabric
→ Mattress topper (optional) with memory foam. (2,000 mm x 700 mm x 30 mm), 300 g/m³ filling, fabric matches with the bunk

A space to suit you

Personalise your vehicle with our extensive range of paintwork options. This high-quality precision work is carried out by our experts directly at our production site.

Renault Trucks makes its expertise available to you, to provide you with a truck with differing levels of customisation, which is quickly available.

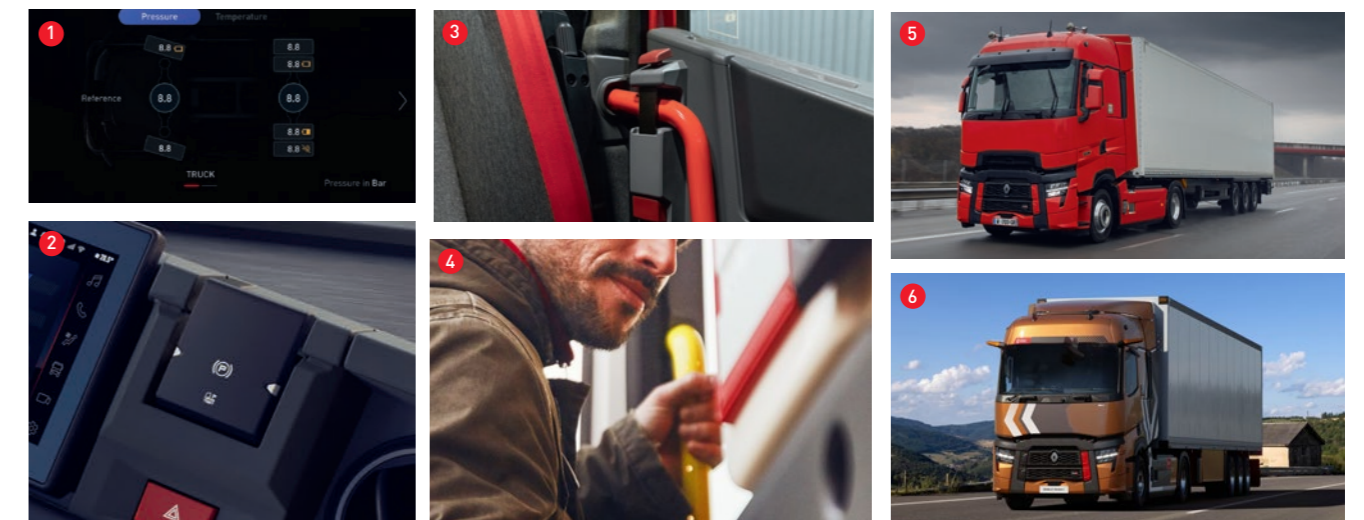

Safety features to support you

Renault Trucks feature the latest driver assistance technologies and the most advanced braking systems. This guarantees not only driver safety, but also that of pedestrians, cyclists, and other road users.

- Driver fatigue detection and lane departure warning system**
→ Audible and visual warning if a lane departure is detected or if the vehicle is following an unexpected trajectory.
- Lane keeping system**
→ In the event of unintentional deviation, crossing the line is prevented and the vehicle is brought back into the lane.
- Radars and cameras installed all around the vehicle**
→ These increase your field of vision and alert you, making performing manoeuvres easier and help avoid any accidents.
- Automatic emergency braking**
→ Warns of possible collisions, then brakes and stops the vehicle if there is no driver input. The brake lights and hazard warning lights come on.
- Hill start assist**
→ Automatically manages braking during hill starts, making it easier for the vehicle to pull away and preventing it from rolling backwards.

- 1 Automatic tyre pressure monitoring**
→ Visual display of vehicle and trailer tyre pressure information in the event of a fault
- 2 Anti-runaway mode (optional)**
→ Emergency application of parking brake
→ Holds the vehicle stationary in the event of incorrect operation by the driver
- 3 Mechanical anti-intrusion locking (optional)**
→ For greater safety in the cab when the vehicle is parked
- 4 Overspeed warning**
→ Camera recognises the prescribed speed limit and warns the driver if this is exceeded, helping to avoid any accidents or penalties
- 5 Driver's airbag (optional)**
→ The airbag is deployed in the event of a serious frontal collision
- 6 Yellow-painted cab access steps and handles (optional)**
→ Improves safety when getting in and out of the vehicle
- 7 Automatic activation of headlights and windscreen wipers**
→ Improves visibility and allows the driver to concentrate on the road
- 8 Rear-view cameras**
→ Increase the driver's direct field of vision
→ Makes manoeuvring and overtaking easier, with night vision and wide-angle vision to keep the trailer in sight
